SUMMARY

Software Engineer with **3+ years** of experience building scalable web applications and **RESTful APIs** using **Python, Django**, and **Django REST Framework**. Skilled in **PostgreSQL, AWS, Docker, RabbitMQ**, and workflow automation, with a strong focus on performance **optimization, system reliability**, and clean **software architecture**.

EXPERIENCE

Software Engineer

Hidden Brains Info Tech Private Ltd 

Jan. 2023 - Present

Ahmedabad, India

- Developed and maintained **10+** enterprise web applications and RESTful APIs using **Python, Django**, and **PostgreSQL**.
- Designed and implemented asynchronous workflows within a **microservice-oriented** architecture using **Celery, RabbitMQ**, and **Docker**.
- Integrated **AWS** services (**EC2, S3, Lambda, SNS, SES**) to support cloud-based solutions and business processes.
- Optimized **database** queries and **indexing** strategies, reducing report generation time from 20s to under 3s.
- Contributed to AI-powered workflow automation solutions using OpenAI APIs, reducing manual effort in order processing and data extraction.

TECHNICAL SKILLS

- Languages:** Python, JavaScript, PHP, SQL
- Backend:** Django, Django REST Framework, Codeigniter
- Databases:** PostgreSQL, MySQL
- Cloud/Tools:** AWS (EC2, S3, Lambda, SNS, SES), Docker, RabbitMQ, Celery, Git, Supervisor, Linux
- Frontend:** HTML, CSS, JavaScript, jQuery, Bootstrap
- AI & Automation:** OpenAI API, Prompt Engineering, AI-Workflow Automation
- Concepts:** RESTful APIs, Microservice Architecture, Database Optimization, Asynchronous Processing, System Design, Data Structures & Algorithms

PROJECTS

Transport Management System | Django, JavaScript, PostgreSQL, OpenAI API, RabbitMQ, Docker, EWS

- Led the technical implementation** of a transport order management platform, collaborating with Business Analysts and QA teams to deliver business-critical solutions.
- Developed an AI-powered email processing system using **OpenAI** APIs that automated order extraction, validation, and creation, significantly reducing manual effort.
- Built high-volume email **synchronization** workflows using **IMAP** and Microsoft Exchange (**EWS**), processing 200k+ emails and over 1M attachments.
- Implemented asynchronous task processing using RabbitMQ and Docker, and optimized PostgreSQL queries and **indexing** strategies, improving system performance by 70%.

Web Pulse | *Django, Django REST Framework, React, PostgreSQL, Celery, RabbitMQ, Docker*

- Developed a website monitoring platform to track uptime, availability, and performance metrics across multiple websites.
- Built RESTful APIs using Django REST Framework and an interactive dashboard using React for real-time monitoring and analytics.
- Implemented scheduled health checks and background task processing using Celery and RabbitMQ to continuously monitor website status.
- Developed real-time alerting and notification systems to notify users of downtime, performance degradation, and service interruptions.

Smart Fuel Stations | *Django, DRF, HTML, CSS, JavaScript, MySQL, RabbitMQ, Docker*

- Developed a fuel station management platform to automate operational workflows, inventory tracking, and sales management.
- Designed RESTful APIs and backend services for sales recording, reconciliation, tank gauging, and automated fuel dispensing.
- Integrated **third-party** Forecourt Controller APIs to communicate with fuel dispensing hardware and enable automated fuel delivery operations.
- Designed scalable and reliable backend services using RabbitMQ and Docker, enabling real-time monitoring, transaction processing, automated reporting, and high system availability.

ACHIEVEMENTS

- Solved **500+ DSA** problems across LeetCode, Coding Ninjas, and GeeksforGeeks.
- Led development of AI-powered workflow automation solutions, improving operational efficiency.
- Designed and implemented scalable asynchronous processing systems using **Celery, RabbitMQ, and Docker**.
- Built enterprise-grade applications across logistics, automation, and monitoring domains.

EDUCATION

Bansal Institute of Research & Technology [RGPV]	Bhopal, India
<i>Bachelor of Technology (Electrical & Electronics Engineering)</i> CGPA: 8.38	Aug. 2019 - May 2023

CERTIFICATIONS

- Python (Basic) Certificate – HackerRank ➡
- Arduino Programming – SOFCON India Pvt. Ltd.
